

# WHEEL HUB KIT

WHEEL HUB • BEARING • AXLE NUT • SEAL • C-CLIP

WJB AUTOMOTIVE

WJB Automotive takes out the hassle of having to purchase and obtain the separate pieces for replacing a generation one hub assembly by introducing WJB Wheel Hub Kits. Our kits include all the necessary components needed for a complete installation: the spindle hub, axle nut, c-clip, wheel bearing, and wheel seal where applicable. Correct fitment is guaranteed as each separate part of the kit is individually verified for the proper application before the part is packaged with the rest of the kit.

WJB Automotive's Wheel Hub Kits are designed to provide the ease of installation with high quality parts. Every piece in the kit is manufactured from high strength steel and tested to meet or exceed OE specifications.

## FEATURES & BENEFITS

- ❖ Engineered and built to OE specifications ensuring perfect fitment and proper operation
- ❖ Manufactured from high grade steel, provided by pre-approved mills, that is certified for material composition and structural integrity
- ❖ Encoder ring is built into the wheel bearing and protected by a seal that prevents contamination of interior operating parts (where applicable)
- ❖ Includes all the necessary components for a complete and hassle-free installation
- ❖ All kits are pre-tested in order to guarantee longevity and optimal performance

# WHAT IS INCLUDED:

## WHEEL HUB

- ✦ Precision engineered for direct fitment without any special modification
- ✦ Utilizes Grade 8 bolts allowing for higher torque strength and a greater preload
- ✦ Optimized flange design reduces noise and improves overall wheel balance

## WHEEL BEARING

- ✦ Pre-lubricated using high performance grease to ensure a longer life span
- ✦ Where applicable, the encoder ring comes pre-installed in the bearing and is protected by seals
- ✦ Manufactured using advanced heat treatment processes for maximum durability

## AXLE NUT

- ✦ Self-locking design guarantees proper functionality and security of the hub
- ✦ Mild thread sealant is pre-applied on the threads for extra grip strength
- ✦ Designed to be easily removed for maintenance

## \* WHEEL SEAL

- ✦ Manufactured from specialized rubber that can operate in extreme temperatures
- ✦ Multi-lip seal design maximizes dirt and contaminant exclusion
- ✦ Dipped in a flexible coat that strengthens metal-to-metal sealing

## \* C-CLIP

- ✦ Made of high grade steel that retains strength after being removed for maintenance
- ✦ Locks in the wheel hub assembly and minimizes vibration

\*Included in kit where applicable

With a wide range of vehicle applications in stock, WJB Automotive is able to provide a reliable and efficient solution for wheel hub replacements. Our kits are specialized for every application and will include all necessary parts for a complete installation.

Please contact us for a full list of vehicle applications.
