Part No:CPA0050P

Visbella® Chain Protect additive is a special designed formula for timing chain system. During the running-in phase of new chain drive parts, these are subject to especially high loads. An increased wear due to metal abrasion or timing chain elongation can be the result. Chain additive can form a highly loadable lubricating film and is applied directly to the chain and gear wheel during installation. This reduces inlet wear of the new components by up to 20% - and increases the durability of the chain drive.
