ABOUT WJB

WJB operates in three major sectors: Automotive Aftermarket, Industrial, and Original Equipment. As one of the most significantly growing suppliers, WJB has served the North American market with superior quality of bearings since 1992. The company's focus on providing superior quality bearings, competitive pricing, ready-to-ship inventory, and personalized service has contributed to the mutual success between WJB and their customers.

WHY WJB?

Within the **Automotive Aftermarket sector**, WJB has been a reliable and competent supplier serving warehouse distributors, national chains, buying groups, and online retailers across the United States, Canada, and Mexico with WJB branded, private labeling, and custom options. Products are manufactured only in highly selective facilities with ISO/TS 16949 certification. WJB's hub assembly line covers an extensive number of SKUs with a top of the industry fill rate.

PACKAGING

Double protections are provided on top and bottom layers to maximize the quality of packaging and to ensure your products arrive in perfect condition.

CATALOGING

WJB's electronic catalog and digital assets are updated with Epicor (Activant) and WHI Solution (Wrenchead) on a regular basis. For the most update-to-date WJB Automotive catalog, please go to **www.wjbautomotive.com** or scan the QR code

INTRODUCTION

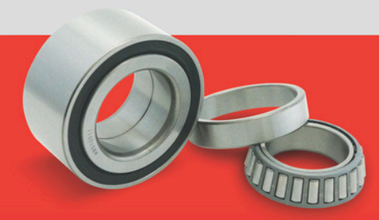

THE COST EFFICIENT SOLUTION

Consumers are always looking for reliable parts to be replaced on their vehicles at reasonable prices. So why risk your business's reputation and long-term profits, or your customers' vehicle safety with inferior quality bearings when you can take advantage of the cost-efficient and top quality bearings that WJB has to offer?

WJB has a proven track record of supplying quality bearings and seals to leading distributors, chains, name brands, and premium brands in the North American Automotive Aftermarket. The quality of Wheel Bearings and seals are essential to ensure vehicle performance, life and safety. WJB is the name you can rely on for the right parts, at the right time, with extensive stock of bearings and seals available covering domestic and foreign vehicle applications in a wide range of models and years. If you would like to find out more about what WJB can achieve for your company, the solution is just one phone call away.
